

Established in the year 1997, **Padmavati Ply Private Limited** has pioneered manufacturing a comprehensive range of **Pre-Laminated Particle Boards & Medium Density Fibre boards (MDF)**.

Having a relatively superior and homogeneous structure, these boards are an excellent substitute for conventional wood and Plywood in almost any interior application.

The demand for High Moisture Resistant (HMR) Boards is also hugely emerging to meet the humid climatic conditions and exterior applications as well.

Perhaps, these boards are the most environment-friendly wood panel product that is available to meet the challenges arising on account of limitations of natural forests and fulfil the growing needs of mankind.

Our boards, branded '**LEO CLASSIC**' are widely acknowledged in the nationwide market for their quality and wide range of thickness and sizes available. Our boards are distinguished with some of the exceptional advantages like high strength, elongated durability, aesthetic designs, ease of machining, dimensional accuracy, abrasion resistance and termite endurance.
